Request doc changes 1

Request doc changes

If you'd like to request changes to the docs and you'd rather not edit the source content directly, you can now provide feedback by clicking **Request doc changes**.

This new button appears at the top of each page:

When you click **Request doc changes**, you're prompted to create or sign in to your GitHub account (it's free and easy to create an account).

After you log in, a form to create a new GitHub issue appears. The text box is prepopulated with the title and URL of the page. Don't delete this information—it helps us identify the page where you found the issue.

A screenshot of the GitHub issue creation form. At the top is a "Title" input field. Below it are two tabs: "Write" and "Preview". To the right of the tabs is a rich text editor toolbar with icons for bold, italic, link, quote, list, and other formatting options. The main text area contains the prepopulated text: "Page: [Selecting the region](https://docs.netapp.com/us-en/cloud_volumes/aws/task_selecting_region.html)". Below the text area is a dashed line and the text: "Attach files by dragging & dropping, selecting them, or pasting from the clipboard." At the bottom left, there is a note: "Styling with Markdown is supported". At the bottom right is a green button labeled "Submit new issue".

Provide details in the text box, and then click **Submit new issue** to create an issue for your request.

We'll review your feedback and take it from there.
