Docs for Cloud Tiering

Documentation for NetApp's new Cloud Tiering service is now available on docs.netapp.com.

Based on NetApp FabricPool technology, Cloud Tiering identifies infrequently-used data in your ONTAP clusters and automatically and seamlessly moves that data to low-cost object storage in the cloud.

Go to the [Cloud Tiering documentation](#) to learn how to get started.

How Cloud Tiering works

08/06/2019 | Contributors

[Edit on GitHub](#) [Request doc changes](#)

Cloud Tiering is a NetApp-managed service that uses FabricPool technology to automatically tier inactive (cold) data from your on-premises ONTAP clusters to object storage in the cloud. Connections to ONTAP take place from the NetApp Service Connector.

i

At this time, Cloud Tiering can tier your inactive data to AWS S3 or Azure Blob storage. Support for additional object storage providers will be added later.

Overview

The following image shows the relationship between each component:

```
graph LR
    CTS[Cloud Tiering service] -- HTTPS --> SC[Service Connector]
    SC -- HTTPS --> OS[Object storage]
    SC -- ONTAP API operations --> ONTAP[ONTAP]
    OS -- Data transfer over an HTTPS connection --> SC
    subgraph Cloud_provider [Cloud provider]
        SC
        OS
    end
```
