# RSS feed on what's new pages

We've added an RSS button to each "What's new" page in the docs so you can receive content updates in your favorite RSS feed reader. These feeds can keep you up-to-date on the new features and enhancements introduced in NetApp products and services.

Go to the "What's new" page for the product or service that you're interested in. Here's an example for the [Cloud Tiering service](#):

The screenshot shows a header section for "What's new in Cloud Tiering". It includes a date "09/09/2019" and a link to "Contributors" with a small profile icon. To the right are two buttons: "Edit on GitHub" and "Request doc changes". Below these is a blue button with an RSS icon and the text "RSS SUBSCRIBE". A red arrow points directly to this button. At the bottom of the section, a paragraph states: "NetApp periodically updates Cloud Tiering to bring you new features, enhancements, and bug fixes."

Depending on your RSS feed reader, copy the page URL or click **RSS Subscribe** and copy the feed URL. Search for the URL in your reader and start following. You should receive updates in your feeds whenever the pages are updated.
